

Grandsire Triples

Where do I start?

This diagram shows the order of work in the method. The accompanying table shows the first few changes in the method and the first work you do as you move around the circle.

Bell Starts With

- 3 One blow in 3rds then in to Lead
- 4 Dodge Up to 5ths and run in
- 6 Dodge Up to 7ths and run in
- 7 Dodge Down to 6ths, two blows at the back and run in
- 5 Dodge Down to 4ths and run out

Next Work

- 4/5 Down
- 6/7 Down
- 6/7 Up
- 4/5 Up
- 3rds

The 2nd bell is also a hunt bell, it starts by going into the lead and then plain hunts. As a signpost, it rings after the treble on the first blow in 7ths place and again as it comes down from the back, in 2nd place before leading.

Work at Bob and Single in Grandsire Triples

This table illustrates how you will be affected if the conductor calls a Bob or Single.

How the Conductor's calls affect your work

| About to Do | Bob Called | | Single Called | |
|-------------|--|-------------------------|--|-------------------------|
| | Do This | Next Work | Do This | Next Work |
| Hunt Bell | Double Dodge in 4/5 Down | 6/7 Down | Same as a Bob | 6/7 Down |
| 4/5 Down | Double Dodge in 6/7 Down | 6/7 Up | Same as a Bob | 6/7 Up |
| 6/7 Down | Double Dodge in 6/7 Up | 4/5 Up | Same as a Bob | 4/5 Up |
| 6/7 Up | Double Dodge in 4/5 Up | 3rds | Same as a Bob | 3rds |
| 4/5 Up | Make 3rds, then become the new hunt bell | Hunting until next call | Make Long 3rds | 4/5 Down |
| 3rds | Unaffected | 4/5 Down as usual | Make 2nds, then become the new hunt bell | Hunting until next call |

Tip: A useful guide for the first four lines in this table where the work is the same for both Bob and Single. The call will come when you are approaching your planned work, so double dodge at that place in the direction you were going if no call had been made. For example in line 2: About to do a 4/5 Down the call comes at 7th place while going down, so double dodge 6/7 Down here = 767676. Referring to the wheel of work, in a plain course if you had just made a 6/7 Down your next work would be 6/7 Up. As an aid to remember your next work - treat the double dodge as if it were a normal dodge and do the next work.

Warning - this does not apply when calls come as you are about to do 3rds or 4/5 Up.
